

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1 **Claim 1 (currently amended):** A radio terminal device

2 comprising:

3 a printed board having a front surface and a rear
4 surface;

5 a resin housing covering the rear surface of the
6 printed board;

7 a metal housing covering the front surface of the
8 printed board; and

9 an antenna disposed on the rear surface of the printed
10 board,

11 wherein at least a part of the printed board, on which
12 the antenna is disposed, is accommodated in the resin
13 housing;

14 ~~wherein a remaining part of the printed board is~~
15 ~~accommodated the metal housing; and~~

16 ~~wherein the antenna is accommodated in the resin~~
17 housing.

1 **Claim 2 (original):** The radio terminal device
2 according to claim 1, wherein the resin housing and the
3 metal housing are joined with each other by a curved line
4 from a viewpoint of the side of the radio terminal device.

1 **Claim 3 (original):** The radio terminal device
2 according to claim 1, wherein the printed board and the
3 metal housing are connected with each other electrically.

1 **Claim 4 (previously presented):** The radio terminal
2 device according to claim 1, wherein the antenna is
3 disposed near an end portion in the part of the printed
4 board.

1 **Claim 5 (previously presented):** A radio terminal
2 device:
3 a printed board;
4 an antenna disposed on a rear surface side of said
5 printed board; and
6 a housing for accommodating said printed board and
7 said antenna, said housing including a metal housing so
8 disposed as to cover a front surface of the printed board
9 and a resin housing so disposed as to cover a rear surface
10 of the print board,
11 wherein at least a part of the rear surface side of
12 said printed board, on which antenna is disposed, is
13 accommodated in the resin housing.

1 **Claim 6 (previously presented):** The radio terminal
2 device according to claim 5, wherein the resin housing and
3 the metal housing are joined with each other by a curved
4 line from a viewpoint of the side of the radio terminal
5 device.

1 **Claim 7 (previously presented):** The radio terminal
2 device according to claim 5, wherein the printed board and
3 the metal housing are connected with each other
4 electrically.

1 **Claim 8 (previously presented):** The radio terminal
2 device according to claim 5, wherein the antenna is
3 disposed near an end portion in the part of the printed
4 board.

1 **Claim 9 (new):** The radio terminal device according to
2 claim 1, wherein the antenna is accommodated in the resin
3 housing.
